KKSP Precision Machining LLC acquires Dune Manufacturing

July 15, 2015, KKSP Precision Machining is pleased to announce the acquisition of Dune Manufacturing, a multi-spindle-focused, precision machined products business located in Melrose Park, IL. Dave Dolan, KKSP President said “we are pleased to combine Dune’s operations with those of KKSP and believe by doing so we can offer Dune’s customers additional resources and serve more of their current and future needs. We are also delighted with the addition of Denis Colht, Dune’s founder and President, to our sales team since Denis brings both passion for customer service and a depth of experience in our market which is hard to find”. Denis Colht said “KKSP Precision Machining is a world-class organization and I am looking forward to serving my customers with the backing of their broad capabilities and capacity.”

KKSP is the largest custom metal products company in the U.S. focused on the multi-spindle cam segment of the market. The company operates over 460 primary production machines across its four TS-16949/ISO-14001 certified Divisions in Illinois, Wisconsin, Michigan, and Mexico. The Dune Manufacturing operation has been consolidated with the nearby KKSP Illinois Division, and several of Dune’s skilled machinists have accepted positions and joined the KKSP team.
